

# Case study

## Healthcare

### Client Mission

- Our client's goal is to build the UK's leading, most innovative and technologically advanced dental manufacturing group, positively disrupting the industry and advancing its capability by integrating progressive businesses, advanced technologies and skilled people.

### Business Challenge

- Newly appointed head of procurement set an objective of managing carbon across the group to support the company's rapid expansion

### Testimonial

*"Carbon Management has helped us to profile our Scope 1, 2 & 3 carbon and allows us to create an actionable carbon management plan"*

## Challenge addressed

- Rapidly deployed 4Carbon to bring clarity to Scope 2 & 3 emissions
- Enhanced spend coefficients to better suit the context of ALS
- Moved to Quantity based coefficients for Supplies & Consumables, Implant Materials & Orthodontic Materials
- Normalised supplier names across the various businesses

## Value delivered

Provided a comprehensive carbon Emissions baseline

Identified the important few suppliers across the group to be engaged on the journey to carbon neutrality

Identified opportunities to reduce emissions and costs through outsourcing activities
